SETTING UP
- Make all cable connections
- Turn the data projector on first, then the laptop
- Set the projector to Computer 1 (may appear as Data 1 or RGB 1)

ADJUSTING THE DISPLAY SETTINGS
- Your laptop image should appear on both the laptop display and the projected image. If this does not happen you may have to set up clone displays (also called duplicate displays).
- If no image appears or the message on the projector says no input you may have to adjust the resolution settings.

METHOD 1
Setting up Clone Displays

1. Right-click on the desktop.
2. Select the following:
   > Graphics Options
   > Output To
   > Clone Displays

   SHORTCUT OPTION
   - Select “Duplicate” + P

Adjusting the Resolution

1. Right-click on the desktop.
2. Select the following:
   > Graphics Options
   > Resolution
   > 1024 x 768
1. Right-click on the desktop.
2. Select “Graphics Properties.”

**Setting up Clone Displays**

Click on “Multiple Displays,” then “Clone Displays.”

**Adjusting the Resolution**

Click on “General Settings” and adjust the resolution to 1024 x 768.
