Review of Chapters 1, 2, 3 & 4

1. What amount increased by 85% will equal 3,350?

2. If I received a 14% discount off of my bill so that I would only have to pay $43.85, what was the original amount of the bill?

3. A property purchased in early 2000 was valued at $92,000. In early 2014 the value of this property is now $220,000. What is the annual average percent gain in the value of this property?

4. Mrs. Smith has an annual salary of $75,000 and is paid weekly. Her regular workweek is 40 hours a week. She is paid time and half if she works overtime. What is her pay for a week in which she worked 45 hours?

5. Larry works on a graduated commission scale. For the first $1,500 of sales he makes a commission of 4%. For the next $1,500 he makes a commission of 6%. If he exceeds $3,000 he makes a commission of 9%. What was his take home pay for a week in which Larry sells $3,500?

6. Sam is supposed to work 40 hours in a week, and if he works overtime, he gets paid at time and one – half his regular rate of pay. If Sam earned $850.20 for 48 hours of work during the last week, what was Sam’s regular rate of pay?

7. A certain good went from $1.50 in the base to $3.99 in the current year. What is the current CPI?

8. In one year the CPI went from 105.6 to 109.2. How much money would you need at the end of the period to match $1,000 at the beginning of the period?

9. If a kitchen suite has a list price of $450 with a trade discount of 25%, what is the net price?

10. If a bookstore receives trade discounts of 15%, 7.5% and 5% on a textbook with a net price of $60.49, what is the single equivalent rate of discount?

11. A 20 inch flat screen television has a net price of $275.75 to the store. What was its list price if the store received a discount of 20% and 10%?

These questions were compiled by Michael Reimer for the Academic Success Centre.
12. A dishwasher has a list price of $695, has a net price to the store of $451.75. What is the rate of discount the store received?

Use the following information for the next two questions:

A discount of 32.5% on an item amounted to a $47.58 discount.

13. What was the list price?

14. What was the net price?

15. A retail store buys an item with a gross price of $45 with a trade discount of 22%. What is the selling price of the item if the store marks the item up 34% of cost?

16. An item purchased by retailer has a list price of $145 and is subject to trade discounts of 15% and 10%. The item was sold for $175 by the retailer. What is the rate of markup on selling price?

17. A sump pump costs a plumber $129.99 less a trade discount of 27.3%. He calculates expenses to be 20% of cost and profit to be 25% of cost. What is the selling price of the item?

18. A light fixture has a cost of $173.18. The merchant calculates expenses to be 27% of selling price and profit to be 18% of cost. What is the breakeven price of the light fixture?

19. Find the reduced selling price of an item if the regular selling price is $449.50 and is then marked down at a rate of 40% of regular selling price.

20. If a high definition television is reduced from $999.95 to $949.95 for a sale, what is the rate of markdown?

21. If you purchased a new PS4 for $399 in Manitoba, how much sales tax would you pay? The GST is 5% and the PST is 8%.

22. If your company made purchases of $56,780 for the quarter and your company’s sales were $80,225, would your company have a remittance or a refund? How much is the remittance or refund?

23. A piece of property has an assessed value of $750,000. The mill rate on this piece of property is 5.3476. What are the taxes it will have to pay this year?
