Solving Quadratic Equations
Using different Methods

Solve Quadratics by Factoring Method:

1) $x^2 - 5x + 4 = 0$
2) $4x^2 + 7x - 2 = 0$

Solve Quadratics by Completing the Square Method:

3) $x^2 - 6x + 3 = 0$
4) $x^2 + x - 7 = 0$

Solve Quadratics by Formula Method:

5) $4x^2 + 7x - 2 = 0$
6) $x^2 + x - 7 = 0$
7) $-15 = 20t - 4.9t^2$
